SUBJECT INDEX TO VOLUME 52

Albumin, bovine serum, ytterbium(III) and gadolinium(III) binding to, 157
Aldopentopyranoses in dimethyl sulfoxide, copper(II) complexes of, 89
Amino acids, chymotrypsin/trypsin and, 165
Anti-inflammatory drugs, metal complexes of, 139
Apoconcanavalin A, thermodynamics of metal cation binding to, 1
Asn-Ser-Phe-Arg-Tyr-NH_2, copper(II) complexes and, 79
Asparagine complexes, copper-, 287
Atrial natriuretic factor, copper(II) complexes of, 79
Azotobacter vinelandii nitrogenase, FeMo cofactor and, 59
Biliverdin, verdomyoglobin conversion and ferric complex of, 297
Calorimetric titration, metal cation binding to apoconcanavalin A and, 1
Cancer, anticancer activities
  DNA copper-ATP complexes, 27
  palladium(II) complexes of putrescine and spermine, 37
  platinum(II) and (IV) complexes, 263
  platinum(II) complexes of β-cyclodextrin diamine derivatives, 183
  tetrachloro(*trans-d,l*-1,2-diaminocyclohexane)platinum(IV) complex, 51
Carbohydrates, copper(II) interactions with aldopentopyranoses in dimethyl sulfoxide, 89
Chymotrypsin, metal-ligated amino acids and dipeptides interaction with, 165
Cobalt(III)-ligated amino acids and peptides, chymotrypsin/trypsin and, 165
Coenzyme B_{12}, thermodynamic studies of, 109
Copper-ATP complexes, DNA, 27
Copper(II)-asparagine, 287
Copper(II) complexes
  aldopentopyranoses in dimethyl sulfoxide and, 89
  Asn-Ser-Phe-Arg-Tyr-NH_2 and, 79
  glycylglycyl-L-histidine, 17
  methemoglobin formation by thiols and, 173
  suprofen and, 139
Copper(II)-histidine-asparagine equilibria, 287
Copper(II)-histidine-serine, 287
Copper(II)-serine, 287
β- Cyclodextrin diamine derivatives, platinum(II) complexes of, 183
d$(GCGCATATGCGC)_2$ conformation, mercury(II) and, 251
Dichloromethane, iron porphyrin reaction with iodosylbenzene and, 191
2',5'- Dideoxynucleosidylcobalamins, 109
5,5'- Dithiobis(2-nitrobenzoic acid), metallothionein-II oxidation by glutathione disulfide and, 235
DNA, magnesium 2+ (aq) and, 121
DNA copper-ATP complexes, 27
Ectothiorohodospira halophila, HiPIP, oxidized, and, 227
FeMo cofactor, azotobacter vinelandii nitrogenase and, 59
Gadolinium(III), binding to bovin serum albumin, 157
Gluconate, magnesium-gluconate interactions, 99
Glutathione, oxovanadium(IV) complexes formed by tripeptide, 275
Glutathione disulfide, metallothionein-II oxidation by 5,5'-dithiobis(2-nitrobenzoic acid) and, 235
Glycylglycyl-L-histidine complexes, copper(II) and nickel (II), 17
Heme *c* peptides, characterization of, 201
HiPIP, oxidized, *Ectothiorohodospira halophila* and, 227
Iodosylbenzene, iron tetraphenylporphyrin chloride reaction with, 191
Iron
  heme *c* peptide characterization, 201
  HiPIP, oxidized, and *Ectothiorohodospira halophila*, 227
Iron tetraphenylporphyrin chloride, iodosylbenzene reaction with, 191
Iron(III) complexes, verdoheme conversion to ferric complex of biliverdin, 297
mer-Trichloro(diethylenetriamine)-platinum(IV) chloride, reaction of, 263
Magnesium 2+ (aq), DNA and, 121
Magnesium-gluconate interactions, ^{13}C NMR relaxation studies of, 99
Manganese(II), trypsin activity oscillations and, 131
Membranes, model, parvalbumin interaction with, 209
Mercury(II), d$(GCGCATATGCGC)_2$ conformation and, 251
Metal cation binding, apoconcanavalin A and, 1
Metal complexes, anti-inflammatory drugs and, 139
Metal ions, parvalbumin interaction with, 209
Metal-sugar interaction, magnesium-gluconate interactions, 99
Metallothionein-II, 5,5'- dithiobis(2-nitrobenzoic acid), glutathione disulfide, and, 235
Methemoglobin formation, copper(II)-induced, 173
Nickel(II) complexes, glycylglycyl-L-histidine, 17
Nitrogenase, FeMo cofactor from azotobacter vinelandii, 59
Oligodeoxyribonucleotides, mercury(II) and, 251
Organocobalamins, thermodynamic studies of, 109
Ormaplatin, x-ray crystal structure of, 51
Oxovanadium(IV) complexes, formation of, 275
Oxygen, active
  pyridoxol rare earth (III) complexes and, 151
  pyridoxol triethanolamine rare earth (III) ternary complexes and, 145
Oxyhemoglobin, copper(II) and, 173
Palladium(II) compounds, putrescine, spermine, and, 37
Parvalbumins, metal ions/model membranes interaction of, 209
Peptides
  chymotrypsin/trypsin and, 165
  glutathione and oxovanadium complexes, 275 heme *c*, 201
Platinum(II) complexes
  antitumor activities of, 263
  β- cyclodextrin diamine derivatives, 183
Platinum(IV) complexes, antitumor activities of, 263
Putrescine, palladium(II) complexes of spermine and, 37
Pyridoxol rare earth (III) complexes, vitamin B_6, 151
Pyridoxol triethanolamine rare earth (III) ternary complexes, 145
Spermine, palladium(II) complexes of putrescine and, 37
Suprofen complex of copper(II), 139
Tetrachloro(*trans-d,l*-1,2-diaminocyclohexane)platinum(IV) complex, x-ray crystal structure of, 51
Tetraplatin, x-ray crystal structure of, 51
Thermodynamic studies
  apoconcanavalin A, 1
  2',5'- dideoxynucleosidylcobalamins, 109
  glycylglycyl-L-histidine complexes of copper(II) and nickel(II), 17
Tripeptides, glutathione and oxovanadium complexes, 275
Trypsin
  manganese(II)-induced trypsin activity oscillations, 131
  metal-ligated amino acids and dipeptides interaction with, 165

Vanadium, glutathione and, 275
Verdomyoglobin, ferric complex of biliverdin and conversion of, 297
Vitamin B_6 pyridoxol rare earth (III) complexes, antioxidative activity of, 151
Vitamin B_6 triethanolamine rare earth (III) complexes, antioxidative activity of, 145
Ytterbium(III), binding to bovin serum albumin, 157
